Investment objective

At all times, this sub-fund invests at least 75% of its assets in equities and/or equity equivalent securities issued by companies that the management team considers to be under-valued as compared to the market on the purchase date and that have their registered office or conduct a significant proportion of their business in the United States of America. The remaining portion, namely a maximum of 25% of its assets, may be invested in money market instruments, financial derivative instruments (mainly futures) for hedging and trading (investment) purposes, and/or cash, and also, within a limit of 15% of the assets, in debt securities of any kind and, within a limit of 10% of the assets, in UCITS or UCIs. The portfolio is built based on a systematic approach, combining several equity factor criteria such as value, quality, low-volatility and momentum.
