Investment objective

The objective of this sub-fund is to replicate the performance of the NASDAQ-100 index and to minimize the tracking error between the net asset value of the sub-fund and the performance of the index. The sub-fund aims to achieve a level of tracking error between the sub-fund and its index that is typically no more than 1%. The index is an index of total return: dividends paid by the index constituents are included in the index return. The NASDAQ-100 Index is a stock index that represents securities that are issued by non-financial companies and traded on the NASDAQ Stock Exchange, an American market that primarily comprises American and non-American stocks.
